We work closely with industry experts to implement secure and compliant telephony payments systems.

As PCI DSS Tier 1 Service and Solutions Providers (the highest possible standard), they are fully accredited to provide a range of secure solutions to process credit and debit card payments via telephone, SMS and/or online.

These PCI DSS compliant systems and solutions enable our customers to offer secure, automated and cost-effective payment options for clients.

How It Works

- » All calls are routed into and out of the PCI DSS Tier 1 Network
- » Agents use a web applet to communicate when to enable payment on the call
- » The transformation into and out of PCI compliance is completely transparent to the caller
- » The web app can show the callers progress when entering their card details and maintain a two-way conversation between the caller and agent
- » The agent can revert the call back to normal operation when PCI compliance is no longer required

Why Choose Us?

- » Reduce the scope of your PCI Compliant infrastructure, timescales and costs to become PCI Compliant
- » Standard Compliance for Telephony, Web and SMS payment mechanisms
- » Intelligent payment services easily built around payment capability
- » Access to unique technical expertise and e-commerce consultancy
- » Ongoing support to maintain PCI compliance & all documentation provided
- » We have a wide range of expertise integrating contact centres and payment systems
